

## SENTENCE DICTATION

### 1.2

#### Master List

**Directions:**

The teacher (or study-buddy) reads the following sentences to the student. The student writes the sentence. After each sentence, the student looks for words that do not look right. The teacher crosses out the word and writes the correct spelling on the bottom. The student writes the correct spelling on top of the word. After each, skip a line and go to the next sentence.

If working in small group, students will look for words that do not look right. Encourage them to work together. Then the teacher will show students the complete sentence with correct spelling. They will cross out the word and write the correct spelling on top. It is important that students are able to see both their incorrect and correct attempts.
